Preliminary Assessment Summary

CAD063821011

March 1984

Goer Manufacturing Company Inc. West
19100 S. Vermont Avenue
Gardena, CA 90248

Preparer: Donald Oliva
Toxic Substances Control Division
Southern California Section

Problem and History:

The Goer Manufacturing Company has been manufacturing department store display fixtures at this site in an industrial area for the last thirteen years. Methyl ethyl ketone waste is generated and stored onsite prior to recycling. Approximately one 55 gallon drum is generated every two months. The site is not closely monitored by local or state regulatory agencies because the quantity of waste generated and stored here is relatively insignificant.

Recommendation:

Since the waste storage area is well secured and poses no problem to the general public, it is recommended EPA take no further action.
